

Operations - Capability Sheet

Version v1.0 | 2026-07-24 | Managed deployment review

Public summary for evaluation. It is not an executed agreement, a warranty, or a certification. Final scope, controls, residency, and terms are defined in your order form, data-processing agreement, and counsel-reviewed contract, which control over this document.

01

What this department is for

Coordinate recurring work, handoffs, stock signals, and exceptions. It is a specialist workbench operated through Jueni Biashara AI: it prepares the work, keeps the source and next move visible, and sends decisions that carry weight to the people responsible.

02

Best for

Task rhythm, procurement preparation, inventory review, vendor follow-up, and operating exceptions.

03

What it prepares

- Prioritised operating queues
- Handoff and exception briefs
- Receipt and completion evidence

04

What it needs from you

- Operating records
- Owners and limits
- Escalation rules

05

What changes

- Fewer unknown owners
- Clearer handoffs
- Inspectable exceptions

06

Human authority stays with you

Purchases, supplier commitments, inventory adjustments, and material operating changes require authorised release.

07

Deployment status

Managed deployment review. Installation follows a scoped deployment contract - isolation, credentials, tools, storage, logs, updates, rollback, support ownership, representative validation, and acceptance review - before any live business system is touched.
